**Re: Technical Review Meeting
Ciba-Geigy Cranston Site**

Dear Mr. Battaglia:

As was discussed during our August meeting, it was suggested that an additional meeting be held in September in order to update all parties on the status of the various Interim Remedial Measures (IRM) being implemented at the site.

The meeting is scheduled as follows:

Date: September 13, 1995
Time: 10:30 A.M. - 3 P.M.
Place: Bldg. 15 - Cranston Site

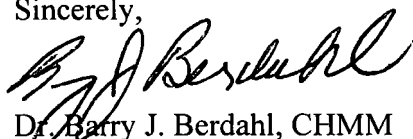

We plan to review/discuss:

- Progress of the Groundwater Stabilization Construction.
- PCB Soils Removal IRM- Final Excavation Results.
- Preview of the Corrective Measures Studies Selected Alternatives.
- River IRM Schedule/Update (as time permits).

Attached your review is a graphic (not to scale) which depicts the latest round of SMU # 5 sampling results and planned excavation areas. We tentatively plan to begin excavation of these areas and two hotspots in the Production Area during the week of August 28.

Please feel free to contact me at (908) 914-2715 if you require additional information.

Sincerely,

Dr. Barry J. Berdahl, CHMM
Manager Regional Remediation
